Filed: March 2, 2004)
For: TREATMENT FOR ARTHRITIS)

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

The instant Supplemental Information Disclosure Statement is submitted to make of record four (4) publications.

The December 8, 2005 article in StemCellNews.com entitled, "5 Patients Get 'New' Knees in NUH Stem-Cell Trial" (Ref. AF) discloses a technique for the repair of damaged knees with autologous stem cells.

The August 2004 article in Arthritis & Rheumatism entitled, “Induction of Remission of Severe and Refractory Rheumatoid Arthritis by Allogeneic Mixed Chimerism” (Ref. AG) describes the successful allogeneic hematopoietic stem cell transplantation (HSCT) performed on a 52-year old woman. Please note the “Before and After” photographs A-D shown on page 2469.

The April 1, 2005 announcement by Osiris Therapeutics, Inc. (hereinafter “Osiris”) entitled, “Osiris Cleared by FDA to Begin Stem Cell Trial for Knee Repair” (Ref. AH) reported that the

Osiris received clearance from the U.S. Food and Drug Administration to begin stem cell trials for

11/24/2006 HGUTEMA1 00000069 10791648

180 00 08

repair of injured knee tissue. Note that the quotations of C. Randall Mills, Ph.D., President and CEO of Osiris, in the second paragraph of the announcement indicate that a large amount of research was performed prior to the FDA clearance. Note further in the last paragraph of the announcement, C. Thomas Vangsness, MD, Professor of Orthopedic Surgery at U.S.C.'s Keck School of Medicine and Chief of Sports Medicine at University Hospital, indicated that the evidence suggests that a simple injection of MSC's into the knee has the potential to regenerate healthy meniscus (emphasis added).

The April 25, 2006 announcement by Osiris entitled, "Osiris Completes Enrollment in Stem Cell Trial for Knee Repair" (Ref. AI) reported that Osiris completed enrollment in the first human clinical trial of stem cell therapy to repair tissue in the knee. Note, again, that another physician, Joel Boyd, MD, an orthopedic surgeon at TRIA Orthopaedic Research Institute, Minneapolis, Minnesota, stated that, "The ability to give patients a simple injection into the knee that could restore the meniscus and prevent the inevitable progression to osteoarthritis would be a significant advancement in the treatment of knee pain." (emphasis added).

Enclosed herewith, please find Form PTO-1449 (Modified) pertaining to the above-identified application. A copy of each publication listed thereon (References AF-AI) is enclosed.

An early action on the merits of the application is respectfully requested.

Respectfully submitted,

Date: November 21, 2006
